Assembly instructions for: **BACKLESS BAR STOOLS**

ASSEMBLY INSTRUCTIONS

CONTENT OF THE BOXES

The parts that go together have the same numbers written next to the predrilled holes they attach to. Align the parts with the numbers as shown for ease of reference

Tools required: ½-inch ratchet and a mallet or small hammer.

1. Turn seat upside down. You'll notice that each corner has a number that corresponds to each leg. Match the leg number to the corner hole and attach with one carriage bolt. Align the predrilled holes, lightly tap the bolt in. The bolts should tap into their holes. If you have to force a bolt, the leg is probably not oriented properly, is in the wrong hole or it is turned around. Make sure the bolts are tapped all the way into the wood, then add washers and nuts and tighten with a ½-inch ratchet. Do not over tighten or you'll crush the redwood and weaken the table's structure.

2 Attach the cross supports to the legs as shown. Just match the numbers to the pre-drilled holes and attach with one carriage bolt.
